Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Stollberg, US005857896A in view of Thyssen, US006290574B1. '896 discloses the claimed invention, including a truing tool for truing an essentially cylindrical grinding worm that is arranged on a tool spindle of a machine for continuous generation grinding in the tangential and diagonal process, the truing tool comprising: an essentially cylindrical gear wheel **27** having an abrasive coating on the surface that is active during truing to profile the flanks of the grinding worm; an essentially cylindrical roll **28** having an abrasive coating on its circumferential surface to adapt the diameter of the addendum circle of the grinding worm; the gear wheel and the roll being axial-resistantly and torsion-resistantly connected to a workpiece spindle of the machine; the gear wheel and the roll are torsion-resistantly

connected to one another and are connectable axial- resistantly and torsion-resistantly with the work piece spindle as a tool unit; and the gear wheel and the roll are a one piece unit. It is the examiner's position that **28** is essentially a cylindrical roll, in that it has a cylindrical shape, and that it's abrasive coated surface adapts the diameter of the addendum circle of the grinding worm. If applicant argues that the roll **28** is not a roll, '574 teaches it is old and well known to change dressing tools dependent on the area of the worm to be dressed. It would have been obvious to one of ordinary skill to replace one of the dressing tools with any type of dressing tool desired, as taught by '574, figures 2a-2c, and their descriptions, to allow any part of the grinding worm to be properly dressed.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other similar dressing tools are cited of interest.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to M Rachuba whose telephone number is 571-272-4493. The examiner can normally be reached on Monday-Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Joseph Hail can be reached on 571-272-4485. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
